

Profile

Results-oriented IFS Technical Consultant with 1.8+ years of experience in technical development, database management, and ERP system implementation. Proven track record at in PL/SQL scripting,executing data migrations, and managing CRIM (Configurations, Reports, Interfaces, Modifications) objects.During a planned career break, actively upskilling in AWS Cloud, Python automation, and cloud-native technologies through hands-on projects involving serverless computing, cloud infrastructure, Docker, CI-CD, Kubernetes, and cost optimization. Seeking to leverage a blend of enterprise technology experience, problem-solving skills, and cloud knowledge in technology-driven roles.

Skills

- ERP & Tools: IFS Developer Studio, IFS Report Designer, IFS Enterprise Explorer (IEE), IFS Aurena, PL/SQL Developer, Crystal Reports.
- Database: Oracle SQL, PL/SQL (Stored Procedures, Packages, Triggers, Views), Data Migration.
- Scripting and Cloud: Python (Automation & Scripting), AWS (Cloud Practitioner Fundamentals, S3, Cloud Front, EC2, EBS, Lambda, IAM, EKS,vpc).
- DevOps & Version control: Docker,Kubernetes,Terraform,CI-CD(Jenkins),Git/GitHub.
- Core Consulting: System Implementation, Data Migration (FNDMIG), User Security/Permission Management,Troubleshooting P1/P2 issues.

AWS projects

Secure Static Website & Technical Blog Hosting using Amazon S3 and CloudFront - GitHub

- Designed and deployed a secure, highly available static website architecture using Amazon S3 and CloudFront.
- Configured content delivery through CloudFront CDN to improve performance and reduce latency.
- Implemented secure access controls and optimized content delivery for global users.
- Documented architecture, deployment process, and operational considerations.
- **Key Skills: AWS S3, CloudFront, CDN, IAM, Website Hosting**

AWS CloudWatch Infrastructure Monitoring & Alert Automation

- Designed and implemented a real-time infrastructure monitoring solution for Amazon EC2 instances using AWS CloudWatch.
- Configured CPU utilization metrics and created threshold-based CloudWatch Alarms to proactively detect performance anomalies.
- Integrated Amazon SNS to deliver automated email notifications whenever resource utilization exceeded defined limits.
- Improved operational visibility by establishing automated monitoring and alerting workflows for cloud

infrastructure.

- Gained hands-on experience with cloud observability, performance monitoring, and incident notification mechanisms.
- **Key Skills:** AWS CloudWatch, SNS, EC2 Monitoring, Cloud Operations, Infrastructure Monitoring, Alerting & Observability

Multi environment AWS resource provision using terraform as Iac - GitHub

- Designed and built a reusable Terraform module architecture for provisioning AWS EC2
- Implemented remote state management with S3 backend and native state locking
- infrastructure (key pairs, security groups, instances) across dev, stage, and prod environments using Terraform workspaces
- **Key Skills:** Teraaform, modules, AWS

Career Break & Professional Up skilling

Sept 2024 - present

- Took a planned career break to address personal health priorities and prepare for re-entry into the workforce.
- learning AWS Cloud and Python automation. Built hands-on cloud projects involving AWS Lambda, S3, CloudFront, EKS, IAM etc.
- Continued strengthening technical problem-solving and cloud infrastructure skills through self-directed learning and project implementation.

Experience

Software Engineer (IFS Technical Consultant), Tech Mahindra – Bangluru, Karnataka Dec 2022 – Sept 2024

- **Data Migration & Management:** Designed and executed SQL and PL/SQL scripts for large-scale data manipulation and cleaning. Successfully managed End-to-End data migration jobs using IFS Migration tools (FNDMIG/Excel Migration), ensuring 100% data integrity IFS applications.
- **CRIM Development:** Managed the full lifecycle of Change Management for Configurations, Reports, and Modifications. Developed and customized Custom Fields, Custom Events, and Event Actions to meet specific client business requirements.
- **Reporting:** Created Quick Reports, and Order Reports and modified Crystal Reports, Optimized query performance to reduce report generation time, earning client appreciation for timely delivery and successful production deployment.
- **Support & Troubleshooting:** Provided technical support for IFS Applications, resolving critical issues related to background jobs, permission sets, and database locks. Collaborated with functional consultants to translate

business needs into technical solutions.

- Documentation & Process: Maintained technical documentation for all customizations and adhered to strict delivery processes during UAT and Production deployments.

Certifications&Achievements

- Google Prompting Essentials - Google(Coursera)
- Python for Data Science, AI and Development – IBM (Coursera)
- AWS cloud practitioner - AWS Educate

Education

KLE Institute of Technology (VTU University), BE in Information Science and
Engineering

Aug 2018 – Jul 2022
